

## Semper 6 Command Reference

**wp**

<b>keys:</b> []	<number>	write-protect specified picture
	<n1>, <n2>	write-protect existing pictures in specified range of picture numbers
<b>options:</b> on/off		turn write-protection on or off

You write-protect a picture with **wp**, and remove the protection using **wp off**.

### Examples

```
wp 40
```

This command protects picture 40 against subsequent deletion or alteration.

```
wp 100, 200
```

This command protects all pictures in the range 100 to 200.

```
wp off 4:3, 4:5
```

This command disables write-protection from pictures 4003, 4004 and 4005.
